

## PRODUCT RECALL

### APPLETISER 6-PACK OF 250ml CANS

We are recalling a very small number of multipacks of Appletiser 6 x 250ml cans due to the presence of an elevated level of chlorate in the product.

The cans impacted are identified by a production code printed on their base – which will be from 328 GE to 338 GE – and best before dates of 30 November 2025 and 31 December 2025.

No other Appletiser products are affected by this issue.

If you have any of these cans, please do not drink them. Instead, call 0800 227711 and a member of our team will be able to help.

The quality and safety of our products is our top priority. We're sorry that, on this occasion, a small number of our products have not met our high standards.
